#### **DETAILED ACTION**

## Claim Objections

1. Claim 1 is objected to because of the following informalities:

The last line of claim 1 recites a method limitation in an apparatus claim.

Appropriate correction is required.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 3. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Thaler (U.S. 5,814,152).

Thaler disclose an apparatus comprising:

a material source means for supplying a material to be deposited (30a);

an atomization means for producing a plurality of discrete particles from said material source means (element 35, column 11, lines 55-59);

a force application means for propelling said plurality of discrete particles generally toward a substrate (element 20, column 11, lines 61-66);

a collimation means for controlling the direction of flight of said plurality of discrete particles (element 20, column 3, lines 22-24, column 6, lines 23-25); depositing said plurality of particles on said substrate (fig. 8, element 12).
